

# BAA's security policy

BAA is committed to being a leader in security management. We believe that good performance in security is essential to a profitable business and our aim is to integrate security into every business process. Consistent with this aim, we have integrated security into BAA's overall mission statement. Our mission is to make BAA the most successful airport company in the world. This cannot be achieved unless the following extract of BAA's mission is delivered:

"To give safety and security the highest priority at all times by systematically assessing and managing our safety and security risks through audited, best practice management systems."

BAA's vision is to eliminate all preventable breaches of security, theft, fraud and resulting business losses on BAA managed premises. Our aim is to be a best practice organisation in the security field, fully compliant with applicable international, national and local standards in all countries in which BAA operates. Where BAA does not have a majority control we will actively encourage the adoption of this policy.
